EDUCATION

Codespace — *Software Development*

JULY 2024 - DECEMBER 2024

I did a 6 months course with Codespace and throughout my time in the bootcamp program, I've grown significantly as a developer and as a problem-solver. Immersed in an intense learning environment, I honed my skills in HTML, CSS, TAILWIND, JAVASCRIPT and REACT. I not only gained technical knowledge but also improved my ability to think critically and approach challenges by breaking them down into small chunks and solving them systematically. The weekly coding challenges strengthened my computational thinking and problem-solving capabilities, and the weekly validation meetings pushed me to learn how to talk about my code and enhanced my soft skills.

TECHNOLOGIES

- HTML
- CSS
- TAILWIND
- JAVASCRIPT
- REACT

SOME OF MY PROJECTS

Cache Bank Website (Landing Page)

I developed a landing page for a fictional company, Cache Bank, showcasing my ability to translate design into functional code while creating an intuitive and user-friendly interface. This project highlights my skills in front-end development and design implementation.

TECHNOLOGIES - HTML, TAILWIND.

Certificate Generator

I developed a dynamic certificate generator, automating the creation of personalized certificates based on user inputs. This project demonstrates my proficiency in JavaScript and working with data.

TECHNOLOGIES - HTML, CSS, JAVASCRIPT
